The easy way to CNC

Digital measuring system for
Stairs, kitchens, windows, doors,
Interior design & stonemasons

MN Metribox®

METRIBOX® – the universal digital measuring system for craftsmen & interior design

METRIBOX® is the next step in the evolution of the proven STAIRBOX® – now expanded for nearly all applications where precise measurements are crucial. Whether stairs, kitchen countertops, window reveals, doors, or complex interior design elements: METRIBOX® delivers precise digital measurements in just a few minutes, eliminating the need for time-consuming templates and manual calculations.

For new construction. For renovations. For custom shapes. For everything that needs to fit perfectly the first time.

+ Why METRIBOX®?

One system – many applications

METRIBOX® was specifically developed for companies that frequently work with individual or irregular components. It is ideally suited for:

- Stairs treads
 - Kitchen worktops & furniture components
 - Wall coverings & niches
 - Windows & doors (even irregular renovation dimensions)
 - Curves, slopes, cutouts & special shapes
-

+ Digital precision in minutes

With the METRIBOX®, you can capture even complex geometries quickly, cleanly, and with absolute reliability. During the measuring process, all points are visualized in real time and saved as a digital template. Your advantages:

- Precise measurement data in just a few minutes
- Reliable repeatability
- Ideal for existing non square walls
- Perfect for complicated fits & cutouts
- Immediate visual check via live-preview

+ Efficient from measurement to production

At the touch of one button, the METRIBOX® generates a digital template image that can be directly processed in your software or production.

Standardized DXF output for:

- CAD programs
- CAM systems
- CNC machining
- Industry-specific software for staircase and furniture manufacturing

This eliminates:

- Manual data entry errors
 - Time-consuming CAD rework
 - Inaccurate templates
 - Rework during assembly
-

+ Greater reliability – fewer complaints

With METRIBOX® you receive precise digital data that creates direct synergies:

- Faster processes
- Fewer sources of error
- Significantly less rework
- Perfectly fitting end products
- Improved cost calculation

Particularly beneficial for:

- Joinery workshops
- Staircase manufacturers
- Kitchen studios
- Window and door manufacturers
- Interior design companies
- Stonemasons
- CNC manufacturing companies

THE RESULT:

Increased efficiency, better quality, and an optimized workflow.

Conclusion

The METRIBOX® is a fully equipped, complete system – without hidden follow-up costs or complicated additional software. The system is intelligently designed, intuitively operated, and proven in daily use.

WELL-DESIGNED.
PRACTICAL.
SIMPLE.
